## Introduction

This document presents the Content Development Policy for Russian and East European Studies (REES). It includes a description of the Library's existing collections and an outline of current collecting areas.

Set within the context provided by an overall Content Development Policy and a related Collection Management Policy, its purpose is to ensure that the selection of resources - books, journals, and other kinds of material – whether print, electronic or of other format, reflect the teaching and research priorities of the School and provide best value in both financial and academic terms.

## Collection Evaluation

The Library has substantial collections in Russian and growing collections in East European Studies, including books and journals, in print and digital formats. The principal collection of printed books, including all reading list items, is kept on Blue 3 in the Main Library and High Demand on Blue Ground.

**Appendix 1** provides an overview of the books in REES by broad subject areas.

**Appendix 2** lists the books purchased from the REES bookfund during the 2009-10 financial year, excluding items purchase as part of other subscriptions.

**Appendix 3** lists current journal subscriptions in the area of REES. It is not necessarily a complete list as there are difficulties in deciding on what constitutes a REES journal. However all journal holdings and subscriptions are listed in the Library catalogue, and all subscriptions to electronic journals are listed in the E-Journals A-Z listing.

**Appendix 4** lists other relevant subscriptions to bibliographic databases and indexes in and around the subject area.

**Appendix 5** presents a general overview of subject related material contained within the Library's Special Collections (Deansgate).

## Bookfund and Resource Allocations

This bookfund is to provide for all non-subscription library materials including printed textbooks and research monographs, electronic books, and any other one-off purchase requirements.

Journals and other subscription items are purchased from a separate fund which at present accounts for over 85% of the cost of all purchases.

## Collection Areas

To support the Discipline Area's scholarly and research activities the Library will acquire material published in the areas listed below:

Russian Studies:

- Ethnic Politics in Russia
- Russian Film and Media
- Russian Intellectual History
- Russian Language
- Russian Literature and Russian Literary Cultures – 20<sup>th</sup> Century

- Russian Nationalism
- Inter-religious dialogues and policies in Russian and Eastern Europe
- Russian Popular Culture
- Soviet Gender and Social Issues
- Soviet Popular Culture

East European Studies:

- Balkan Languages and Literature
- Medieval Slavic Culture
- Cultural Changes in Eastern Europe
- Polish Cultural History
- Constructing Cultural Memory and Past in Eastern Europe

The Library does not actively collect Special Collections material in this area and purchases of material are generally considered a low priority. However, donations or deposit of material to supplement existing strengths would be considered.

## Document Supply Service

Although the Library will try to accommodate all requests for purchase, books which lie outside the areas listed above or are out of print can be obtained on loan from another library through the Document Supply Service. Such books are usually borrowable for up to 6 weeks at a time. Journal articles and other material not available from within the Library's collections can also be obtained through this service.

## Teaching and Learning

The Library will support all taught course modules.

Multiple copies and / or electronic copies of texts will be purchased or subscribed to as appropriate. Subject to copyright restrictions (see below, under Digitisation) the Library will digitise materials not otherwise available electronically – for instance book chapters, or journal articles – if required for taught course modules.

Reading lists and estimated student numbers should be sent to the Faculty Team Librarian by July 31 and December 31 each year so any new material can be purchased and processed in time for the forthcoming semester.

The library's software package *Link2Lists* affords the opportunity of creating multi-media **resource lists**. Hyperlinks to audio files, video clips, podcasts and the like can all be included in a resource list alongside traditional bibliographic references to print material, e-books and journal articles, which can link directly through to entries in the Library catalogue. Library staff can provide training and support to academic staff interested in using Link2Lists software rather than a traditional word processing package, and embedding resource lists into Blackboard modules.

Access to reading list texts can be further increased by the use of the 7-day loan period option (which protects them from external borrowers) or by transferring items into the High Demand Collection from where they can be borrowed for shorter periods.

## Digitisation

Subject to copyright restrictions the Library will digitise material according to its Digitisation Strategy. Priorities include reading list items – book chapters or journal papers – and items from Special Collections. The University holds a Copyright Licencing Agency (CLA) Higher Education Comprehensive Scanning Licence which covers most UK / US publications but many other countries are excluded.

## Manchester e-Scholar

The University's institutional repository, Manchester eScholar, manages and disseminates the intellectual outputs of the university. Since the beginning of 2010 all accepted PhD theses have been added to the repository.

## Stock Editing

Most stock is kept on the Library's open shelves. As space is at a premium, especially in the Main Library, periodic weeding is used to remove less-well used material to store from where it can be retrieved usually within one working day.

Unused duplicates are disposed of from time to time.

Weeding and withdrawal criteria are described in the Collection Management Policy.

## Donations

Offers of donations are welcome, but they can normally only be considered for acceptance if they are within the collection areas detailed above.

Other factors taken into account in deciding upon acceptance are listed in the Collection Management Policy.

## Recommendations

The Library welcomes recommendations for the purchase of books from staff and students of the School. Purchases are normally made if:

- Recommendations fall within the scope of the policy as described above;
- Funds are available;
- The item is not already in stock.

Usually:

- Only a single copy of any printed book is purchased;
- They must be of an appropriate academic standard.

For reading list texts, multiple copies and electronic versions will be considered as appropriate. Recommendations can be made directly to the Faculty Team Librarian.

Journal recommendations are considered twice a year (May/June and November). Because of the forward financial commitment involved journal subscriptions usually have to be balanced by savings elsewhere in the subscription budget. Recommendations should be made through the Discipline's Library Representative.
